

I can order fractions less than 1

For the activities, the children will find it useful to find some equivalent fractions to help solve the problems.

5a. Finish the model to show $\frac{2}{6}$ and $\frac{5}{18}$.

Compare using $<$, $>$ or $=$.

VF

5b. Finish the model to show $\frac{8}{15}$ and $\frac{3}{5}$.

Compare using $<$, $>$ or $=$.

VF

6a. Match the fraction to the correct model and then put them in ascending order.

1. $\frac{2}{3}$ A.
2. $\frac{5}{6}$ B.
3. $\frac{5}{12}$ C.

6b. Match the fraction to the correct model and then put them in descending order.

1. $\frac{8}{10}$ A.
2. $\frac{1}{2}$ B.
3. $\frac{11}{20}$ C.

7a. True or false?

VF

7b. True or false?

VF

8a. Circle the largest fraction. Use the models to help you.

VF

8b. Circle the largest fraction. Use the models to help you.

VF

Challenge

4a. Luna is comparing the fractions $\frac{2}{9}$ and $\frac{2}{3}$.

I know that $\frac{2}{9}$ is larger than $\frac{2}{3}$ because a ninth is three times bigger than a third.

Is she correct? Show how she could use a diagram to check her answer.

R

5a. Use two number cards to complete the equation.

$$\frac{3}{5} > \frac{\square}{\square} > \frac{2}{5}$$

Find two possibilities.
