

Geography

Drawing a map

What is an aerial view?

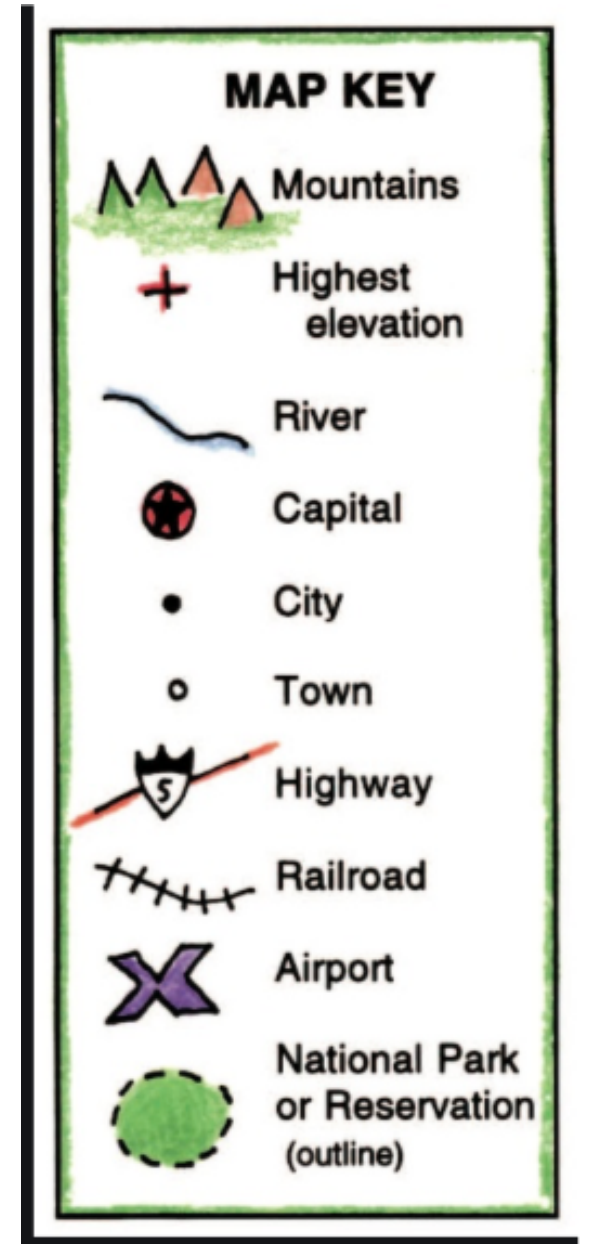

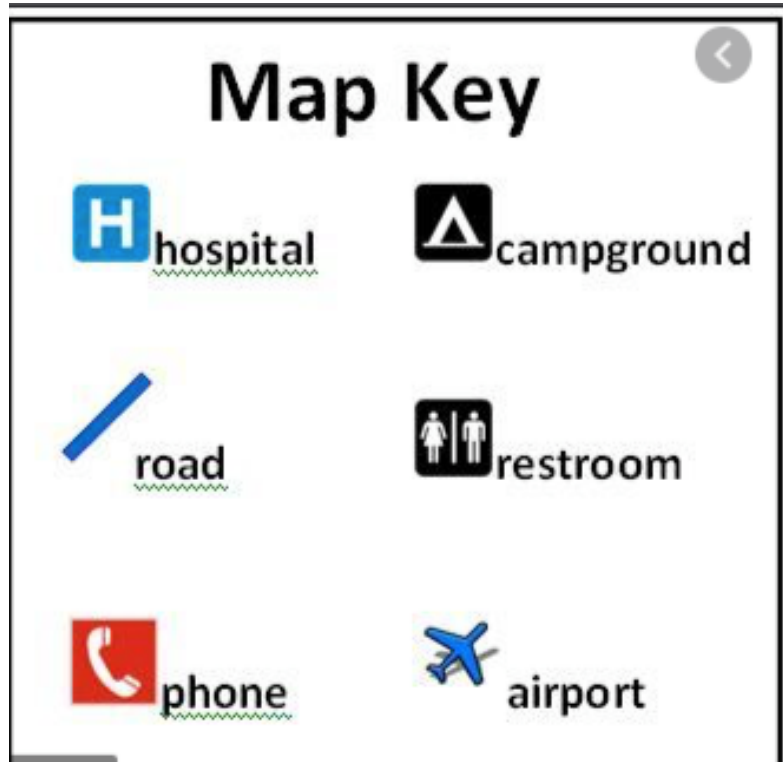

Aerial views are when the view is from above, like you are looking down on to the area.
You will draw your map as an aerial view.

What is a key?

Keys are used to symbolise something on a map.

We draw little pictures to show where something is on a map.

Your task

- 1) Hide an object in a room in your house.
- 2) Draw an aerial map of the room.
- 3) Create a key using symbols.
- 4) Mark the hidden object with an X on your map.
- 5) Can a family member use the map to find the object?

There is a template on the activity 10 document if you would like to use it
