

Activity 7

| Adding and Subtracting Fractions | Back to Basics |
|-------------------------------------|------------------------|
| 1.) $\frac{4}{8} + \frac{1}{4} =$ | 4.) $\frac{1888}{8} =$ |
| 2.) $\frac{10}{12} - \frac{2}{3} =$ | 5.) $4,399 \times 4 =$ |
| 3.) $\frac{8}{15} + \frac{2}{5} =$ | 6.) $6,009 + 2,199 =$ |
| | 7.) $8,892 - 4,388 =$ |

Challenge

How many different ways can you balance the equation?

$$\frac{5}{9} + \frac{\square}{9} = \frac{8}{9} + \frac{\square}{9}$$
