

Dear Year 4,

We have discovered that you have been learning about plants and know all about the five main stages of the life cycle of a flowering plant.

We are very impressed with your learning and decided we would like you to appear on our science themed TV show!

We need you to explain the five main stages of the life cycle of a flowering plant to our viewers.

How you present this is completely up to you! Here are some ideas but you don't have to use one of these!

- You could produce a script you could use on the show.
- You could create an information book to share with our viewers.
- You could record a video of yourselves explaining the process.
- You could create some art work to support your explanations.

I look forward to seeing your ideas.

Regards

Mr J. Smith
