

Research: look online to find a recipe.

To help you:

- Look back at the letter from task 1 and pick out information about what criteria your burger needs to meet (e.g. what did Adam say about how healthy the burger needed to be?)
- Use your research! What did you find out are popular toppings in your family?
- Look online for recipes, using your chosen ingredients and write it down/save a copy (<https://www.bbcgoodfood.com/> BBC Good Food search tool is always a great bank of resources).
- You may need to wait for your family to get some of these ingredients before making, but while you wait you can move on to designing your burger.
