4. oesophagus	A. This is a muscular tube where peristalsis happens which moves the bolus.
5. stomach	B. This is a muscular bag which mixes the food.
2. teeth	C. These rip, tear and chew the food.
6. small intestine	D. This is a long, thin tube which absorbs nutrients.
1. mouth	E. This is where the digestive system starts.
3. tongue	F. This is a muscle which creates a bolus and pushes it to the top of the oesophagus.
8. rectum	G. This is where all 'food' that our bodies do not want is stored as poo!
9. anus	H. This is what we push poo out of!
7. large intestine	I. This is a short, thick tube which squeezes excess water from the 'food'.
